Rick and Morty API

The Rick and Morty API provides access to detailed information about the animated series universe, including data on characters, episodes, and locations. It is a REST API that returns responses in JSON, allowing queries about names, statuses, species, genders, origins, and character images, as well as details about episodes and places. Free and requiring no authentication, it is ideal for educational projects or applications related to the series universe, with accessible and easy-to-use documentation available
